

Llwynifan Farm CCTV policy

Introduction

Llwynifan Farm uses closed circuit television (CCTV) images to provide a safe and secure environment for family and visitors to our premises, such as guests, clients, customers, contractors and suppliers, and to protect the farms property.

This policy sets out the use and management of the CCTV equipment and images in compliance with the Data Protection Act 1998 and the CCTV Code of Practice. We have carried out a Data Privacy Impact assessment, and consulted with Local police, Local Councillors and County councillors.

Llwynifan farm CCTV facility records images only. There is no audio recording i.e. conversations are not recorded on CCTV.

Purposes of CCTV

The purposes of our CCTV systems include:

- To assist in the prevention or detection of crime or equivalent malpractice.
- To assist in the identification and prosecution of offenders.
- To monitor the security of the farms business premises.
- To ensure that health and safety rules and farms procedures are being complied with.
- To easily find out if a pitch has become vacant.

Location of cameras

Cameras are located at strategic points throughout the premises, principally at the main road into and out of the farm. The family have positioned the cameras so that they only cover communal or public areas on the premises and they have been sited so that they provide clear images. No camera focuses, or will focus, on toilets, shower facilities or changing rooms.

All cameras are also clearly visible.

Recording and retention of images

Images produced by the CCTV equipment are intended to be as clear as possible so that they are effective for the purposes set out above. Maintenance checks of the equipment are undertaken on a regular basis to ensure it is working properly and that the media is producing high quality images.

Images may be recorded either in constant real-time (24 hours a day throughout the year), or only at certain times, as the needs of the business dictate.

As the recording system records digital images, any CCTV images that are held on the hard drive of a PC or server are deleted and overwritten on a recycling basis and, in any event, are not held for more than one month. Once a hard drive has reached the end of its use, it will be erased prior to disposal.

Images that are stored on, or transferred on to, removable media such as CDs are erased or destroyed once the purpose of the recording is no longer relevant. In normal circumstances, this will be a period of one month. However, where a law enforcement agency is investigating a crime, images may need to be retained for a longer period.

Access to and disclosure of images

Access to, and disclosure of, images recorded on CCTV is restricted. This ensures that the rights of individuals are retained. Images can only be disclosed in accordance with the purposes for which they were originally collected.

The images that are filmed are recorded centrally and held in a secure location. Access to recorded images is restricted to the operators of the CCTV system and to those line managers who are authorised to view them in accordance with the purposes of the system. Viewing of recorded images will take place in a restricted area to which other employees will not have access when viewing is occurring. If media on which images are recorded are removed for viewing purposes, this will be documented.

Disclosure of images to other third parties will only be made in accordance with the purposes for which the system is used and will be limited to:

- The police and other law enforcement agencies, where the images recorded could assist in the prevention or detection of a crime or the identification and prosecution of an offender or the identification of a victim or witness.
- Prosecution agencies, such as the Crown Prosecution Service.
- Relevant legal representatives.
- Line managers involved with Company disciplinary and performance management processes.
- Individuals images have been recorded and retained (unless disclosure would prejudice the prevention or detection of crime or the apprehension or prosecution of offenders).

Hywel and Cathrin are the only people permitted to authorise disclosure of images to external third parties such as law enforcement agencies.

All requests for disclosure and access to images will be documented, including the date of the disclosure, to whom the images have been provided and the reasons why they are required. If disclosure is denied, the reason will be recorded.

Individuals' access rights

Under the Data Protection Act 1998, individuals have the right on request to receive a copy of the personal data that the Company holds about them, including CCTV images if they are recognisable from the image.

If you wish to access any CCTV images relating to you, you may make a written or verbal request to the Hywel or Cathrin. Your request must include the date and approximate time when the images were recorded and the location of the particular CCTV camera, so that the images can be easily located, and your identity can be established as the person in the images. We will respond promptly and in any case within one month of receiving the request.

We will first determine whether disclosure of your images will reveal third party information as you have no right to access CCTV images relating to other people. In this case, the images of third parties may need to be obscured if it would otherwise involve an unfair intrusion into their privacy.

If we are unable to comply with your request because access could prejudice the prevention or detection of crime or the apprehension or prosecution of offenders, you will be advised accordingly.

Implementation

We are responsible for the implementation of and compliance with this policy and the operation of the CCTV system and will conduct a regular review of the farms use of CCTV. Any complaints or enquiries about the operation of the CCTV system should be addressed to Hywel or Cathrin.
